Semantic Analysis is a lively and clearly written introduction to the study of meaning in language, and to the language-culture connection. Cliff Goddard covers essential background on traditional and contemporary issues and approaches, and then takes the reader through a series of case studies in descriptive semantics. He includes topics such as emotions, speech acts, colours, concrete objects, motion, causative verbs, and grammatical categories. The author draws on a rich range of material from a diversity of languages, including Arrernte, Ewe, Japanese, Malay, Polish, Spanish, and Yankunytjatjara. The main method used is reductive paraphrase in natural language, an approach which is rigorous yet accessible, and each chapter has a selection of interesting and often thought-provoking exercises to involve students in practical semantic analysis. This is the first real textbook on cross-cultural, cross-linguistic semantics.

Emotions in Crosslinguistic Perspective, Jean Harkins, Anna Wierzbicka, 2001, Language Arts & Disciplines, 421 pages. This volume aims to enrich the current interdisciplinary theoretical discussion of human emotions by presenting studies based on extensive linguistic data from a wide range of.
